Jericho "Action" Jackson (an awesome Carl Weathers, fresh from his stint in the other equally awesome "Predator") is justifiably a little peeved following his demotion after a fracas with the son of Detroit industrialist Peter Dellaplane (a suitably oily Craig T. From Anger to Action tells the stories of the citizens’ movements charting new paths to tackle the big global challenges that lie behind the political upheavals of our times. Drawing on candid insights from citizens, activists, and innovators, and their own experiences as leaders of internationally recognized advocacy organizations, the authors give an insider account of the battle for change and how it can be won – as well as trenchant criticism of where traditional civil society has lost its way and needs renewal. While unflinching on the dangers of the current political crises, the book offers hard-edged hope and a vision for citizen-led change to reshape our fractured politics. We meet communities in economically-battered towns welcoming refugees and Syrian peacebuilders reaching across impossible divides, go behind the scenes with Fairtrade banana farmers and hear of frenzied climate campaigners pushing divestment from oil companies and using social media to drive change. Lamb and Jackson explore how citizens’ movements are transforming our global politics, refashioning internationalism and fighting back against narrow nationalism. The book analyses why some movements secure lasting change – and others fail. And they show how these insights could shape a wider strategy for grassroots-up transformation. From Anger to Action will be of interest to social activists and anyone interested in social movements, global change, and civil society.

<div> <div><div></div><div>"Given the weaponization of cultural and ideological differences in politics, education, and social media today, the need to understand and fight prejudice is urgent. This second edition of Lynne Jackson's seminal text presents a significantly updated review of the psychological underpinnings of prejudicial thoughts and behaviors. Jackson synthesizes new research from various areas of psychology to analyze contemporary examples of prejudice, including anti-immigrant policies, police violence against minorities, anti-woman and LGBTQ backlash, and ageist cultural biases. She also explores frequently overlooked issues related to prejudice, such as environmental inequality and speciesism. Drawing from literature in evolutionary, developmental, social, and personality psychology, Jackson explores the biological and environmental roots of prejudice, including how people develop essentialist views in childhood and learn to favor ingroup members and dehumanize outgroup members. She draws connections between these beliefs and other social justice issues showing how they give rise to greater social problems like inequality and political polarization. She also offers readers a blueprint for overcoming these deeply embedded biases by improving intergroup attitudes and building communities to create progressive social change" --</div></div></div>
