one-stop reference for the essential information you need to confidently begin the planning process and successfully complete the design of college and university buildings, large or small, on time and within budget. Award-winning architect and planner David J. Neuman and a roster of industry-leading contributors share their firsthand knowledge to guide you through all aspects of planning higher education facilities, including learning centers, academic buildings and professional schools, scientific research facilities, housing, athletics and recreation facilities, social and support facilities, and cultural centers. The book combines up-to-date coverage of essential issues related to campus planning, programming, and building design guidelines with detailed project examples. This new edition offers:

- Numerous photographs, diagrams, plans, and sections
- Updated project examples, including several buildings completed in the last decade
- Up-to-date coverage of sustainability and technology issues
- A new chapter on historic preservation, rehabilitation, and adaptive use of existing buildings
- New material on the influence of interdepartmental collaboration and renewed communication on the built environment for campuses

This conveniently organized quick reference is an invaluable guide for busy, dedicated professionals who want to get educated quickly as they embark on a new project. Like every Building Type Basics book, it provides authoritative, up-to-date information instantly and saves professionals countless hours of research.

The architect's primary source for information on designing for egress, evacuation, and life safety, *Egress Design Solutions, Emergency Evacuation and Crowd Management Planning*, is written by proven

experts on egress issues. Meacham and Tubbs are engineers with Arup, an international firm with a stellar reputation for quality design and engineering. Their book examines egress solutions in terms of both prescriptive and performance-based code issues. A portion of the book focuses on techniques for providing egress design solutions and for coordinating egress systems with other critical life safety systems. Another part reviews historic and recent tragic life-loss fire events. As such, this is easily the most comprehensive take on the subject, written especially for architects.

Are you thinking of starting a museum? *Starting Right: A Basic Guide to Museum Planning* uses straightforward, non-technical language to share the basics of museum planning in an evening 's read. The third edition has been fully revised and updated to address the current issues facing new museums, including the increasing use of digital technologies.

Planning Successful Museum Building Projects provides comprehensive, practical guidance on planning, financing, implementing, managing, and evaluating all kinds of museum construction projects.

The definitive reference on designing commercial interiors-expanded and updated for today's facilities Following the success of the ASID/Polisky Prize Honorable Mention in 1999, authors Christine Piotrowski and Elizabeth Rogers have extensively revised this guide to planning and designing commercial interiors to help professionals and design students successfully address today's trends and project requirements. This comprehensive reference covers the practical and aesthetic issues that distinguish commercial interiors. There is new information on sustainable design, security, and accessibility-three areas of increased emphasis in modern interiors. An introductory chapter provides an overview of commercial interior design and the challenges and rewards of working in the field, and stresses the importance of understanding the basic purpose and

functions of the client's business as a prerequisite to designing interiors. This guide also gives the reader a head start with eight self-contained chapters that provide comprehensive coverage of interior design for specific types of commercial facilities, ranging from offices to food and beverage facilities, and from retail stores to health care facilities. Each chapter is complete with a historical overview, types of facilities, planning and interior design elements, design applications, a summary, references, and Web sites. New design applications covered include spas in hotels, bed and breakfast inns, coffee shops, gift stores and salons, courthouses and courtrooms, and golf clubhouses. In keeping with the times, there are new chapters focusing on senior living facilities and on restoration and adaptive use. A chapter on project management has been revised and includes everything from proposals and contracts to scheduling and documentation. Throughout the book, design application discussions, illustrations, and photographs help both professionals and students solve problems and envision and implement distinctive designs for commercial interiors. With information on licensing, codes, and regulations, along with more than 150 photographs and illustrations, this combined resource and instant reference is a must-have for commercial interior design professionals, students, and those studying for the NCIDQ licensing exam.
