"The greatest measuring rod of love in the life of a Christian may be forgiveness, because God showed His love to us in terms of forgiveness." ?John MacArthur Does anyone really want to forgive? Or admit that we need forgiveness? Whether we're giving or receiving, forgiveness is hard. It seems unfair. It feels unnatural. And as best-selling author and pastor John MacArthur demonstrates, forgiveness apart from Christ is unnatural. It is only as we understand our need, Christ's power and example, and what it really means to love that we can embrace two of the most liberating acts of love: forgiving and being forgiven. The Truth About Series For decades MacArthur has encouraged countless Christians to develop a deeper understanding of the Bible and a greater respect for God's truth. In The Truth About series, he now gathers his landmark teachings about core aspects of the Christian faith in one place. These powerful books are designed to give readers a focused experience that centers on God's character and how it applies to their daily walk of faith.

Internationally renowned author, Susan Jeffers, has helped millions of people round the globe to overcome their fears and heal the pain in their lives. Her now classic work, Feel the Fear and Do It Anyway, has been a huge worldwide success and continues to ride high in the bestseller charts because it showed us all, in simple terms, how to transform our anxieties into confidence, action and love. Feel the Fear...and Beyond is a practical companion to this important book - yet it also stands alone as a must-have for facing life and facing fears in the twenty-first century. Filled with valuable exercises, it is designed to teach us that we can handle whatever life brings us in a powerful and life-affirming way. Susan Jeffers encourages us to make full use of these valuable tools when we are fearful of making changes or confronting new situations in our lives.

Cognitive neuropsychology has now established a major place in the teaching of undergraduate psychology degrees and is an important topic of postgraduate research. The subject is also of increasing interest to clinicians because of its links with devising remediation procedures for people with brain injury. Explorations in Cognitive Neuropsychology is the first major text to appear on this topic since the late 1980s and thus introduces the reader to a vast amount of research previously unavailable in textbook format. The book is written in a lively and engaging style which nonetheless enables the reader to get a scholarly, in-depth overview of this important field. The coverage of topics is very broad-ranging. It begins with an overview of the subject including issues such as research strategy and advances in neuroimaging. Following this are chapters on blindsight, agnosia, facial processing impairments, and the rapidly growing area of neglect. The next chapter is devoted to studies of the split brain. Two chapters then cover the enormous developments in devising functional architectures of the language system from the observation of discrete language impairments. Various aspects of memory impairments are then discussed and the book ends with a consideration of frontal lobe functions. At various points the book also covers the contribution of connectionist modelling to cognitive neuropsychology.

Increased productivity. High morale. Effective change management. Reduced workplace conflict, stress, and burnout. These aren't laughing matters -- or are they? Most business leaders today completely overlook one of the most valuable tools available to them humor. Using dozens of examples and anecdotes, this book explores the connections between humor and creativity, teamwork, risk-taking, and effective communication. In addition to exploring the benefits of humor, the author also provides research-based explanations and answers to important questions like: -- What is humor? -- Why is it so closely related to creativity -- How does it reduce stress? The book also includes exercises and tips to help you experience the benefits of humor for yourself, and will show you how to implement them in your work.

Luke wrote the book of Acts as a testament to the explosive spread of the gospel and the rapid growth of the church after Christ ' s ascension. Beginning with the outpouring of the Holy Spirit on Pentecost when the church was born, he shows how Christ empowered His followers with divine authority to preach the gospel to all nations. Luke also shows how, even in the midst of persecution and opposition, the early believers were able to rely on God ' s spirit for direction and continue with the work He had given them to do. God showed His infinite power regardless of the circumstances, just as He continues to do today. The MacArthur Bible Studies provide intriguing examinations of the whole of Scripture. Each guide incorporates extensive commentary, detailed observations on overriding themes, and probing questions to help you study the Word of God with guidance from John MacArthur.

An invaluable teaching text and clinical resource, this is a book about how to do psychotherapy--how to apply the science of change to the complexities of helping people develop new meanings in their lives. Explaining constructivist principles and illuminating what a skilled clinician actually does in day-to-day practice, Michael J. Mahoney shows how to nurture the therapeutic relationship while implementing such creative interventions as centering techniques, problem solving, pattern work, meditation and embodiment exercises, drama and dream work, and spiritual exploration. Appendices feature reproducible client forms, handouts, and other useful materials.

How do we reconcile our need to express our emotions with our desire to protect others? Far too often we find ourselves trapped in this dilemma of expression versus repression. We fear that by expressing our true feelings, we will hurt and alienate those close to us. But by repressing our emotions—even in the benevolent guise of " self-control " —we only risk hurting ourselves. Osho, one of the most provocative and inspiring spiritual teachers of our time, provides here a practical and comprehensive approach to dealing with this conflict effectively. Incorporating new, never-before-published material, Emotional Wellness leads us to understand the roots of our emotions, to react to situations in a way that can teach us more about ourselves and others, and to respond to life ' s inevitable ups and downs with far greater confidence and equilibrium. Discover: • The impact that fear, anger, and jealousy have on our lives • How emotions like guilt, insecurity, and fear are used to manipulate us • How to break out of unhealthy responses to strong emotions • How to transform destructive emotions into creative energy • The role of society and culture on our individual emotional styles Osho ' s unique insight into the human mind and heart goes far beyond conventional psychology. He teaches us to experience our emotions fully and to deal with them creatively in order to achieve a richer, fuller life.

Given the impact that good nutrition and keeping fit have on health and well-being in later life WHO in collaboration with the Tufts University USDA Human Nutrition Research Center on Aging organized a consultation to review the scientific evidence linking diet and other factors - especially exercise - affecting nutritional status disease prevention and health promotion for older persons. The consultation focused primarily on practical issues including the establishment of explicit recommendations to improve the health and nutritional status of older persons in a wide variety of socioeconomic and cultural settings. During the production of a comprehensive report representing the outcome both of the preparatory work and of the consultation itself it was recognized that new information emerging in several key areas should also be included. The combined results presented here are intended as an authoritative source of information for nutritionists general practitioners gerontologists medical facilities nurses care providers schools of public health and social workers. The specific recommendations concerning nutrient intakes food-based dietary guidelines and exercise and physical activity should also interest a larger audience including the general reader.
