Saunders and Cornett's Financial Institutions Management: A Risk Management Approach 7/e provides an innovative approach that focuses on managing return and risk in modern financial institutions. The central theme is that the risks faced by financial institutions managers and the methods and markets through which these risks are managed are becoming increasingly similar whether an institution is chartered as a commercial bank, a savings bank, an investment bank, or an insurance company. Although the traditional nature of each sector's product activity is analyzed, a greater emphasis is placed on new areas of activities such as asset securitization, off-balance-

sheet banking, and international banking.

Financial Markets and Institutions, 5e offers a unique analysis of the risks faced by investors and savers interacting through financial institutions and financial markets, as well as strategies that can be adopted for controlling and managing risks. Special emphasis is put on new areas of operations in financial markets and institutions such as asset securitization, off-balance-sheet activities, and globalization of financial services.

Financial Markets and Institutions, 7th Edition is aimed at the first course in financial markets and institutions at both the undergraduate and MBA levels. It offers a distinct analysis of the risks faced by investors and savers interacting through financial institutions and financial markets and introduces strategies that can be adopted to control and manage risks. Special emphasis is placed on new areas of operations in financial markets and institutions, such as asset securitization, off-balance-sheet activities, and globalization of financial services. - Part 1 provides an overview of the text and an introduction to financial markets.- Part 2 presents an overview of the various securities markets.- Part 3 summarizes the operations of commercial banks.- Part 4 provides an overview of the key characteristics and regulatory features of the other major sectors of the U.S. financial services industry.- Part 5 concludes the text by examining the risks facing modern financial institutions and financial institution managers, and the various strategies for managing these risks. New to This Edition- Tables and figures in all chapters have been revised to include the latest data.- After the Crisis boxes in each chapter have been revised to highlight significant events related to the financial crisis.- Updates on the major changes proposed to financial regulation have been added throughout the book.- Discussions of how financial markets and institutions continue to recover have been added throughout the book.- Discussions of Brexit's effect on risks and returns for investors are featured.- Explanations of the impact of initial interest rate increases by the Federal Reserve are given.- Details about the impact of China's economic policies are provided. Digital resources within Connect help students solve financial problems and apply what they've learned. This textbook's strong markets focus and superior pedagogy are combined with a complete digital solution to help students achieve higher outcomes in the course. Financial Markets and Institutions is aimed at the first course in financial markets and institutions at both the undergraduate and MBA levels. While topics covered in this book are found in more advanced textbooks on financial markets and institutions, the explanations and illustrations are aimed at those with little or no practical or academic experience beyond the introductory-level finance courses. In most chapters, the main relationships are presented by figures, graphs, and simple examples. The more complicated details and technical problems related to in-chapter discussion are provided in appendixes to the chapters. Since the author team's focus is on return and risk and the sources of that return and risk in domestic and foreign financial markets and institutions, this text relates ways in which a modern financial manager, saver, and investor can expand return with a managed level of risk to achieve the best, or
