Written by one of the most succesful aerospace authors, this new book develops aircraft performance techniques from first principles and applies then to real airplanes. It also address a philosophy of, and techniques for aircraft design. By developing and discussing these two subjects in a single text, the author captures a degree of synergism not found in other texts. The book is written in a conversational style, a trademark of all of John Anderson's texts, to enhance the readers' understanding.

From a Hackney council estate to the House of Lords, this is the extraordinary story of one of our greatest entrepreneurs. Alan Sugar was born in 1947 and brought up on a council estate in Clapton, in Hackney. As a kid he watched his dad struggle to support the family, never knowing from one week to the next if he'd have a job. It had a huge impact on him, fuelling a drive to succeed that was to earn him a sizeable personal fortune. Now he describes his amazing journey, from schoolboy enterprises like making and selling his own ginger beer to setting up his own company at nineteen; from Amstrad's groundbreaking ventures in hi-fi and computers, which made him the darling of the stock exchange, to the dark days when he nearly lost it all; from his pioneering deal with Rupert Murdoch to his boardroom battles at Tottenham Hotspur FC. In this compelling autobiography, he takes us into the world of The Apprentice, and describes his appointment as advisor to the government and elevation to the peerage. Like the man himself, What You See Is What You Get is forthright, funny and sometimes controversial.

What is the difference between a fire fighter and an architect? One deals with crises as they arise while the other is capable of building something that can withstand all weathers. Using this analogy, Architects of Change provides you with the tools to grasp, leverage and harness the dynamics that shape tomorrow's markets. It encourages you to nurture an entrepreneurial mind-set to transform the way a business – or even an entire industry – operates. Tackling crucial topics related to geopolitics, creative destruction, fake news, resilience and creativity, this book gives you the tools to analyse your environment and future trends in order to reinvent the way you do business. It teaches you how to:
· Identify actors of change
· Conduct simulations about the future
· Assess threats of political instability
· Build a strategy for a profitable and sustainable firm amid ongoing uncertainty
· Become an architect of change yourself.
Containing original interviews with industry insiders, including a world-famous expert on brands and luxury, the former CEO of a major think tank, a thought leader from CISCO, the former chairman of the US National Intelligence Council, and a former chief political scientist of a large Asian bank, this book helps you to understand the type of imagination and creativity this business environment requires not only to survive, but thrive.
