Standard Journal Abbreviation (ISO4) - International Journal of Management and Decision Making The Standard Abbreviation (ISO4) of International Journal of Management and Decision Making is " Int. J. Manag.

International Journal of Management and Decision Making ...

Research in Management Decision features interesting and novel questions, robust conceptual and theoretic foundations, rigorous methodologies, provocative findings, and bold implications. The journal advances the field of management with novel informative content and powerful implications for business scholars, leaders, and professional managers around the world.

Management Decision | Emerald Publishing

Managerial and Decision Economics will publish articles applying economic reasoning to managerial decision-making and management strategy. Management strategy concerns practical decisions that managers face about how to compete, how to succeed, and how to organize to achieve their goals. Economic thinking and analysis provides a critical foundation for strategic decision-making across a variety of dimensions.

Managerial and Decision Economics | Wiley

The journal focuses on disseminating the latest research in the field of management information system and its role in decision making, as well their relationships to cognate disciplines including Economics, Finance, Management, Management Science, Marketing, Statistics, Operations Research and Engineering.

Journal of Management Information and Decision Sciences ...

For convenience, the "Online Ready" papers are given a temporary pagination, starting with page 1. As the final pagination is not yet available, please cite these articles using their DOI in the following format: (author names)(article title) International Journal of Information Technology & Decision Making, [DOI], [online publication date].

International Journal of Information Technology & Decision ...

The International Journal of Educational Management (IJEM) provides those interested in the effective management of the educational process with a broad overview of developments and best practice in the field, with particular reference to how new ideas can be applied worldwide.

International Journal of Educational Management | Emerald ...

The principal objective of the International Journal of Strategic Decision Sciences (IJSDS) is to establish an effective channel of communication between policy makers, government agencies, practicing managers, academic and research institutions, and persons concerned with the development of new methodologies to formulate and solve strategic problems by applying decision sciences methods.

International Journal of Strategic Decision Sciences ...

Theory and Decision is devoted to all aspects of decision-making, exploring research in psychology, management science, economics, the theory of games, statistics, operations research, artificial intelligence, cognitive science, and analytical philosophy. Moreover, it addresses cross-fertilization among these disciplines. This journal draws special attention to experimentation in decision ...

There is an immense amount of information to be considered when attempting to solve complex strategic problems. To recognize the complexity of this process, the creation of tools and techniques are essential to aid decision makers in developing a rational model for strategy evaluation. Management Theories and Strategic Practices for Decision Making brings together a collection of research aiming to provide communication for the management of new methodologies to solve strategic problems and applying decision making approaches. This reference is useful for government agencies, practicing managers, academic and research institutions interested in bringing together strategic decision-making and decision sciences.

In the course of a single investor-state dispute, an arbitrator may make numerous decisions, from interpreting the treaty or national laws to taking into account case law, customs and policies. In practice, this process raises important issues regarding the consistency of decisions and the predictability and legitimacy of the decision-making process in general. Investment arbitration tribunals have developed a specialised process of legal decision making adapted to the interpretational needs that arise in the context of an investor-state dispute and to the transnational characteristics of the investment arbitration framework. This is the first book to offer an in-depth analysis of the transnational characteristics of investment arbitration and to analyse the interpretive arguments of investment tribunals and the way they use treaties, precedent, policies, general principles of law and customary law in their decision-making process. Drawing on publicly available arbitral case law supplemented with personal interviews with investment arbitrators, the author touches on such concepts and practices as the following: - an overview of various decision-making genres of arbitral tribunals: attitudinal, economic, strategic and legal; - the legal argumentation triptych of language – rhetoric – dialogue; - the specific language arbitrators have developed when interpreting the law; - how arbitrators use the concepts 'standards', 'rules', 'principles' and 'rights'; - the importance of the legal reasoning of arbitral awards and the role of rhetoric therein; - concepts of 'acceptability', 'audience' and 'legitimacy'; - limitations of the public international law interpretive methodology enshrined in the Vienna Convention; - interpretation of precedents, customary law, general principles of law and policies; - the way national and international legal orders interact in the context of interpretation; and - how decision-making is connected to the issues of predictability, consistency and the rule of law. The core of the book proposes a novel, full-edged dialogical network theory for analysing the interpretation process. As an exemplary demonstration of developing theory to keep up with practice, this unique book provides a deeply engaged means for enhancing the practice of international arbitration. Its introduction of a new field of interdisciplinary analysis employing legal argumentation theories is sure to provide inestimable guidance for institutions and policymakers, especially in light of recent proposals for the creation of a permanent investment arbitration court. Given that unwinding the legal decision-making process is critical for the well-being of the whole dispute resolution procedure, and that being aware of how arbitrators interpret the law can constitute a roadmap for counsel's arguments and approaches when dealing with cross-border disputes, the topic of this book is relevant for both academics and practitioners, and its significance can only grow as recourse to investor-state arbitration continues to expand.

Event Studies is the only book devoted to developing knowledge and theory about planned events. It focuses on event planning and management, outcomes, the experience of events and the meanings attached to them, the dynamic processes shaping events and why people attend them. This title draws from a large number of foundation disciplines and closely related professional fields, to foster interdisciplinary theory focused on planned events. It brings together important discourses on events including event management, event tourism, and the study of events within various disciplines that are able to shed light on the roles, importance and impacts of events in society and culture. New to this edition: New sections on social and intangible influences, consumer psychology and legal environment, planning and policy framework to reflect recent developments in the field Extended coverage of philosophy and research methods and how they can best be used in event studies; social media as a marketing tool, and the class and cultural influences of events New and additional case studies throughout the book from a wide range of international events Companion website to include PowerPoint slides and updated Instructor ' s Manual including suggested lecture outlines and sequence, quizzes per chapter and essay questions.

The vast amount of information that must be considered to solve inherently ill-structured and complex strategic problems creates a need for tools and techniques to help decision-makers recognize the complexity of this process and develop a rational model for strategy evaluation. Decision Making Theories and Practices from Analysis to Strategy is a definitive focus on analytical strategic decision-making. This work is comprised of sophisticated tools and methodologies developed by researchers and vendors to improve decision making for business strategy. Extracting from a wide range of disciplines, including accounting, finance, information systems, international management, marketing, organizational management, operations research, production and operations management, and strategic management, this volume provides a conceptual and a utilitarian guide to decision making, perfect for both researchers and practicing professionals alike.

Asset management is becoming increasingly important to an organization ' s strategy, given its effects on cost, production, and quality. No matter the sector, important decisions are made based on techniques and theories that are thought to optimize results; asset management models and techniques could help maximize effectiveness while reducing risk. Optimum Decision Making in Asset Management posits that effective decision making can be augmented by asset management based on mathematical techniques and models. Resolving the problems associated with minimizing uncertainty, this publication outlines a myriad of methodologies, procedures, case studies, and management tools that can help any organization achieve world-class maintenance. This book is ideal for managers, manufacturing engineers, programmers, academics, and advanced management students.

"This book provides the latest research studies, market analysis, and best practices utilized in emerging markets to gain competitive advantage and market leadership"--Provided by publisher.

Intelligent Decision Technologies (IDT) seeks an interchange of research on intelligent systems and intelligent technologies which enhance or improve decision making in industry, government and academia. The focus is interdisciplinary in nature, and includes research on all aspects of intelligent decision technologies, from fundamental development to the applied system. This volume represents leading research from the Third KES International Symposium on Intelligent Decision Technologies (KES IDT ' 11), hosted and organized by the University of Piraeus, Greece, in conjunction with KES International. The symposium was concerned with theory, design, development, implementation, testing and evaluation of intelligent decision systems. Topics include decision making theory, intelligent agents, fuzzy logic, multi-agent systems, Bayesian networks, optimization, artificial neural networks, genetic algorithms, expert systems, decision support systems, geographic information systems, case-based reasoning, time series, knowledge management systems, rough sets, spatial decision analysis, and multi-criteria decision analysis. These technologies have the potential to revolutionize decision making in many areas of management, healthcare, international business, finance, accounting, marketing, military applications, ecommerce, network management, crisis response, building design, information retrieval, and disaster recovery for a better future.
