Though all research is steeped in methodological and ethical quandaries, it is further complicated when a researcher crosses cultural borders. Given the increasingly multi-cultural nature of research populations and of recent global collaborations, researchers often find themselves working with those unlike themselves. Seventy cross-cultural researchers from multiple disciplines, from mainstream academia and from marginalized groups in six nations and four continents address the overarching question: "How can one do cross-cultural research with integrity?" Author and researcher narratives comprise a substantial portion of the book; stories, many humorous, some heart-wrenching, some heart-warming, contextualize complex concepts and explore the richness that cross-cultural research and collaborations can bring to the researcher, to the knowledge base surrounding real world problems, and to those researched. These contextualized insights, covering all phases of the research process, allow the reader to inductively construct their own research beliefs and plans.

The “good one.” But passion has its own logic, and Eric finds he can't forget the curvy beauty with whom he shared a night of lust. When Beth discovers that Eric lied, however, she knows he can't be trusted. Her mind tells her to forget the intense stranger who brought her so much pleasure. If only every fiber of her being didn't burn to call him back. Book 3 of *Donovan Brothers*.
