Mitsubishi Mirage Engine | A Powerhouse Under The Bonnet

The 1.0-litre engine is available only with the basic-entry level Mirage. It generates 70bhp and 88Nm of pulling power, which is enough to push the Mirage from 0-62mph in 13.6 seconds and on to a top speed of 107mph. Most buyers are expected to opt for the more powerful and better equipped 1.2-litre Mirage which puts out 79bhp and 106Nm.

The Mirage has been streamlined for efficiency, both in shape and weight. Along with the MIVEC engine and your choice between 5-speed manual or CVT automatic, this Mirage doesn't gulp fuel, it sips. MORE ABOUT THE ENGINE

Mitsubishi Mirage | Our Compact Hatchback Range For City ...

Mirage featured four-wheel independent suspension, rack and pinion steering, plus front disc brakes. Power initially came from 1,244 and 1410 cc iterations of the familiar Orion engine, putting out 72 and 82 PS (53 and 60 kW), respectively. Of particular note, the 1410 cc variant featured "modulated displacement"—a system that could shut down cylinders under cruising or idle conditions to ...

Mitsubishi Mirage - Wikipedia

The Dassault Mirage III (French pronunciation:) is a family of single-seat, single-engine, fighter aircraft developed and manufactured by French aircraft company Dassault Aviation. It was the first Western European combat aircraft to exceed Mach 2 in horizontal flight. In 1952, the French government issued its specification, calling for a lightweight, all-weather interceptor.

Dassault Mirage III - Wikipedia

The Dassault Mirage 2000 is a French multirole, single-engine fourth-generation jet fighter manufactured by Dassault Aviation. It was designed in the late 1970s as a lightweight fighter to replace the Mirage III for the French Air and Space Force (Armée de l'air et de l'espace). The Mirage 2000 evolved into a multirole aircraft with several variants developed, with sales to a number of nations.

Dassault Mirage 2000 - Wikipedia

The Mirage F1 was of similar size to the delta-winged Mirage III and Mirage 5, and was powered by the same SNECMA Atar engine as had been used on the larger Dassault Mirage IV; however, unlike its predecessors, it shared the layout of a swept wing mounted high on the fuselage and a conventional tail surface as used by the F2.

Dassault Mirage F1 - Wikipedia

Turning our attention to the Mirage's engine we need to get a bit more power out of the top end. With our pointers your Mirage can become an awesome performer and prove to be reliable daily run around. The best power gains come from larger engine sizes.

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Starting in 1956 when Ford officially entered motor racing, this book takes the reader on a journey of how and why things happened the way they did. Who were the personalities behind the all the different Ford GT development programs, old and new.

Authored by veteran author John Baechtel, **COMPETITION ENGINE BUILDING** stands alone as a premier guide for enthusiasts and students of the racing engine. It will also find favor as a reference guide for experienced professionals for years to come.
