Wanted: Dating coach to help hot nerd win back the woman of his dreams... Picture this - I ' m ready to win back the love of my life, and I ' m going big this time. We ' re talking boom box, sing her name in the rain, let the whole damn neighborhood know I'm good and ready this time around. After all, if you're going to grand gesture the ever-loving hell out of a second chance, you need to pull out all the stops. There ' s only one little problem. My college girlfriend isn't the one who shows up when I play my "I'll do anything to win you back" tune. The woman who flings open the second-floor window tells me my ex doesn ' t live here anymore. But she'll help me win her back. Anything for romance, anything for a guy so willing to go big for love. And that's what I want at first. Until I get to know my new " romance coach " and discover she ' s funny, clever, and keeps me on my toes. And boy, do I ever need that. Now I don't want to win anyone else ' s heart. I want the woman who's been helping me all along. Trouble is - she thinks I'm in love with someone else, and when we take off on a road trip, everything I think I know about women is about to be unzipped and turned inside out. *Unzipped is a standalone spinoff in the Lucky in Love series of standalones*

By examining the stories of companies like LoJack, MySpace and Groupon, an expert in Strategic Management describes how organizations can sustain high-growth through a repeatable process for innovation without succumbing to the growth hump. 30,000 first printing.

Enlisting as a group when one of them is drafted into the Vietnam War, best friends Morris, Rudi, Ivan and Beck pledge their loyalty to one another before reporting to different branches of service, where they are watched over by Morris, who has been experiencing haunting dreams.

The National Cancer Institute (NCI) has designated the topic of real-time data capture as an important and innovative research area. As such, the NCI sponsored a national meeting of distinguished research scientists to discuss the state of the science in this emerging and burgeoning field. This book reflects the findings of the conference and discusses the state of the science of real-time data capture and its application to health and cancer research. It provides a conceptual framework for minute-by-minute data capture- ecological momentary assessments (EMA)- and discusses health-related topics where these assessments have been applied. In addition, future directions in real-time data capture assessment, interventions, methodology, and technology are discussed.Despite the rapidly growing interest in the methodology of real-time data capture (e.g. journal special issues, widely attended conference presentations, etc.), to date no single book has focused solely on this topic. The volume will serve as an important resource for researchers, students, and government scientists interested in pursuing real-time health research, and will nicely complement our lists in epidemiology, public health, and oncology.
