Inspired by a voracious curiosity about humans and other subjects, the poems in Heather Christie ' s What Is Amazing describe and invent worlds in an attempt to understand through participation. The book draws upon the wisdom of foolishness and the logic of glee, while simultaneously exploring the suffering inherent to embodied consciousness. Speakers play out moments of bravado and fear, love and mortality, disappointment and desire. They

socialize incorrigibly with lakes, lovers, fire, and readers, reasoning their way to unreasonable conclusions. These poems try to understand how it is that we come to recognize and differentiate objects and beings, how wholly each is attached to its name, and which space reveals them. What Is Amazing delights in fully inhabiting its varied forms and voices, singing worlds that often coincide with our own.

Originally published in 1984, this work is organised in three parts. Each part consists of several related chapters. Each chapter explores the assumptions and implications of a closely related group of concepts in depth. Part 1 explores what a structure is. It considers such

notions as content, context, constraint, unity, integrity, and the hierarchical and nucleate forms of organization. Part 2 critically explores the dynamic (energetic) conceptualization of psychological and social phenomena. Thus, this part considers such notions as energy, entropy, activity, confirmation, discrepancy, and resistance, as they apply to and affect the stability, activity, and changes observed in psychological and social structures. The relationship among the biological (metabolic), psychological, and social levels of analysis are explored from a rather simplified thermodynamic point of view. In Part 3 brings all these earlier considerations to bear upon the processes by which these structures grow and develop. It explores the concept of development itself, and such related issues as the levels-by-stages model of development, the distinction between intrastructural and intergenerational development, the orthogenic principles, the process of primordial differentiation and integration, development as a dialectical process, and the relationship between growth and development. The Epilogue indicates briefly some of the implications of the present thesis for future empirical and theoretical investigations.

Once upon a time, salad was iceberg lettuce with a few shredded carrots and a cucumber slice, if you were lucky. A vegetable side was potatoes—would you like those baked, mashed, or au gratin? A nice anniversary dinner? Would you rather visit the Holiday Inn or the Regency Inn? In Grand Forks, North Dakota, a small town where professors moonlight as farmers, farmers moonlight as football coaches, and everyone loves hockey, one woman has had the answers for more than twenty-five years: Marilyn Hagerty. In her weekly Eatbeat column in the local paper, Marilyn gives the denizens of Grand Forks the straight scoop on

everything from the best blue plate specials—beef stroganoff at the Pantry—to the choicest truck stops—the Big Sioux (and its lutefisk lunch special)—to the ambience of the town's first Taco Bell. Her verdict? "A cool pastel oasis on a hot day." No-nonsense but wry, earnest but self-aware, Eatbeat also encourages the best in its readers—reminding them to tip well and why—and serves as its own kind of down-home social register, peopled with stories of ex-postal workers turned café owners and prom queen waitresses. Filled with reviews of the mom-and-pop diners that eventually gave way to fast-food joints and the Norwegian specialties that finally faded away in the face of the Olive Garden's endless breadsticks, Grand Forks is more than just a loving look at the shifts in American dining in the last years of the twentieth century—it is also a surprisingly moving and hilarious portrait of the quintessential American town, one we all recognize in our hearts regardless of where we're from.
