Lewis Terman heralded the field of gifted education in the United States by tracing the development of high-IQ children from their childhood in the1920s to midlife and beyond. The contemporary field of gifted education, building on the work of Terman and others, presumes that gifted children become exceptional adults. Longitudinal research offers the opportunity for critical examination of the way gifted children and adolescents are identified and illuminates the characteristics and experiences that affect sustained achievement. Only long-term studies can directly address whether or not gifted education is finding the right people and doing the right things. The studies demonstrate the fit between longitudinal methodology and the central issues of gifted education. Collectively, they investigate the early determinants of later academic and career achievement and creativity while employing varied identification practices, perspectives, theoretical orientations, and populations.

Recent research findings have challenged the idea that creativity is domain-general. Domain Specificity of Creativity brings together the research information on domain specificity in creativity -- both the research that supports it and answers to research arguments that might seem to challenge it. The implications for domain specificity affect how we move forward with theories of creativity, testing for creativity, and teaching for creativity. The book outlines what these changes are and how creativity research and applications of that research will change in light of these new findings. Summarizes research regarding domain specificity in creativity Outlines implications of these findings for creativity theory, testing, and teaching Identifies unanswered questions and new research opportunities

Focuses on strategies to engage the learner's interest throughheightening anticipation and stimulating continual involvement. Provides a practical scheme for integrating the cognitive and affective components of thinking skills instruction.

Discover how creativity depends on inside-the-box thinking-that's right, not outside the box-and a new perspective on creative thinking.
